Summary

Motivated Computer Science undergraduate with hands-on experience in full-stack web development using the MERN stack (MongoDB, Express.js, React.js, and Node.js). Strong foundation in Data Structures Algorithms, software engineering, and modern web technologies. Skilled in problem-solving and competitive programming with regular LeetCode practice. Passionate about building scalable, user-centric applications and continuously learning new technologies.

Education

B.Tech in Computer Science and Engineering

IMS Engineering College (2023 – 2027)

CGPA: 8.64

Intermediate (12th), CBSE

Tithonus International School

Percentage: 91%

High School (10th), CBSE

Tithonus International School

Percentage: 85%

Skills

Programming Languages: C++, JavaScript, Python, SQL

Data Structures & Algorithms: Arrays, Linked Lists, Trees, Problem Solving

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST APIs

Database: MongoDB, SQL, Relational Databases

Frameworks & Libraries: React.js, Express.js, Node.js

Tools & Platforms: Git, GitHub, VS Code, Postman

Core Concepts: Object-Oriented Programming (OOP), Operating Systems, DBMS, Computer Networks

Soft Skills: Teamwork, Communication, Problem Solving.

Projects

Hybrid AI Log Classification | *Python, Sentence Transformers (BERT), Regex, LLMs, FastAPI* | GitHub

- Developed a hybrid log classification system combining Regex, BERT-based Sentence Transformers, Logistic Regression, and LLMs to handle logs of varying complexity.
- Designed and deployed a FastAPI-based REST API for real-time log processing, improving classification accuracy by 40% and reducing manual effort.

Spam Detection Model | *Python, scikit-learn* | GitHub

- Built a machine learning model to classify SMS/email as spam or not spam.
- Applied TF-IDF vectorization and trained a Naive Bayes classifier achieving around 95% accuracy.

Social Network Recommendation System | *Python, pandas* | GitHub

- Developed a graph-based recommendation engine simulating features like “People You May Know”.
- Processed and cleaned JSON data to model and analyze user relationships within the network.

Achievements & Certifications

- **LeetCode Practice:** Solved 300+ problems focusing on Data Structures and Algorithms (DSA) using C++.
- **AI Deployment & Automation Internship (EduSkills, 2026):** Successfully completed an 8-week internship program in AI Deployment & Automation.
- **The Ultimate Job Ready Data Science Certification (2025):** Gained hands-on experience in Python, Machine Learning, and real-world data science projects.
- **Python 101 for Data Science (Cognitive Class):** Learned Python fundamentals, data structures, and basic data analysis techniques.
